Basic

Access control system

simple . flexible . secure

SOYAL Basic system is efficiently optimized for low budget door, turnstile, parking and elevator access control system. Effectively control who (card user) can enter where (door group) at what time (time zone) using what method (card and/or pin).

Low budget economical solution

Highly optimized and simpler design made Basic system to be most affordable best value PC based access control system in market.

Compact modern design

Reader is built in RFID for easier installation, lesser wiring and overall lower maintenance cost. Modern contemporary design can match any decoration.

Easy to use software

Software has clean GUI and optimized to provide practical function instead of crowded with unnecessary features. This make our software easier to learn, simpler to use and easier to be assist by technical support. Our software is simpler enough for small company and yet powerful enough to cater the needs of big organization.

Time attendance

Flexible multi shift system automate clocking report to review total work time, break time and overtime of staff. No more long hours of manual calculation. Lateness, early out, long lunch and absenteeism report allow you to monitor staff punctuality and improve company efficiency.

Built-in alarm function

External alarm will sound off and notify software if door is forced open or left open too long. Alarm can be armed / disarmed by password. Extra value added feature.

CCTV integration

Camera can capture picture for every in and out as visual evidence. This greatly enhances the effectiveness of access control and accuracy of attendance clocking.

Clean and easy interface

- Lite Standalone function
- Pro Basic Client/server network and CCTV
- Pro Advance More extensive network and CCTV

Basic RFID access control system

AR721H is a single door reader with built-in RFID. AR721H can work standalone (1024 users) or connect to AR716 multi-door interface (15K users). During AR716 failure, AR721H will auto switch to standalone mode and continue to run as a secondary system. Generally, AR721H is installed inside as EXIT reader while AR721U is installed outside as ENTRY reader.
